SUMMARY

I'm an enthusiastic problem-solver with strong communication skills and meticulous attention to detail, leveraging experience from managing complex data systems and implementing process improvements in healthcare. I recently developed proficiency in JavaScript, HTML, and CSS through intensive coursework at LaunchCode, which fueled my passion for building things with code. I'm now aiming to jump into a junior developer role within a collaborative, hybrid team, eager to use my skills to craft user-friendly solutions and make a genuine impact.

LANGUAGES | FRAMEWORKS | TOOLS

JavaScript, HTML, CSS | React, Jest | TBD

EXPERIENCE

CarFinder — LaunchCode Unit 1 Final Project

- Developed an interactive web application that leverages a user preference quiz to educate potential car buyers and recommend personalized new car models.
- Architected and implemented the core quiz logic, utilizing a structured dataset to dynamically display relevant questions and capture user input efficiently.
- Integrated interactive modal components to provide just-in-time education, enhancing user engagement and information retention.
- Engineered a dynamic results component that parses user data to render a personalized list of recommended vehicles and highlight applicable features.
- Built the application using Vite and React with JavaScript, HTML, and CSS, managing version control via Git and deploying the solution via GitHub Pages.

Administrative Assistant — PennReach

April 2025 - Present

- Coordinate with cross-functional teams to identify and remediate informational deficiencies, implementing data quality checks to meet critical filing deadlines.
- Develop and execute a technical training curriculum focused on critical computer skills, leveraging best practices in user education and change management.
- Lead the digital transformation initiative for medical documentation by researching, evaluating, and selecting secure digital signing technologies.
- Employ skills to enhance team camaraderie and performance to earn Quarterly Teamwork Award.

Business Administrator — Ardmore Toyota

October 2024 - March 2025

- Managed and maintained data integrity for sensitive customer information across disparate systems, ensuring accuracy and security.
- Implemented rigorous testing and validation procedures to audit deal compliance by exercising strong attention to detail.
- Analyzed and resolved complex issues during the funding process by serving as the primary liaison between the dealership and financial institutions.

EDUCATION

LaunchCode, Software Development, 2026

University of Pittsburgh, Bachelor of Science in Business Administration, Marketing
