SUMMARY

A results-driven communicator with a track record of breaking down complex technical concepts for diverse audiences, from car buyers and wireless customers to healthcare staff and executive teams. Repeatedly earns recognition and promotion for performance and integrity. Knowledgeable in JavaScript, HTML, CSS, and Java. Looking to bring his technical literacy and people-first communication to a junior developer role where clean, intuitive solutions matter to the end user.

LANGUAGES | FRAMEWORKS | TOOLS

JavaScript, HTML, CSS, Java | React, Spring Boot | Git, npm, Postman, MySQL

EXPERIENCE

Reactive Roots — LaunchCode Capstone Project

- Built a browser-based RPG game engine with real-time state management, timer logic, and rule-based player interaction
- Architected core game engine, utilizing React's useRef hook to update state and implementing guard clauses to guide player interaction
- Integrated web pages with React's Outlet component to conditionally render header and footer components based on active route
- Engineered MVC structure in Spring Boot, which connects to a MySQL database that persists player account progress across sessions via REST API endpoints
- Full project tech stack: React, JavaScript, HTML, CSS, Git, Spring Boot, Java, MySQL

Administrative Assistant — PennReach

April 2025 - Present

- Built an automated Excel tracking tool that flags critical documentation deadlines across chart audits, catching ~10 deficiencies per audit cycle and ensuring timely compliance for triennial licensing requirements
- Designed and delivered an Outlook training program for 20+ staff across three departments - after strong demand led to expansion beyond the original 2 offices - resulting in an estimated 65% reduction in requests to locate past emails
- Led evaluation of three digital signature platforms to replace a fully paper-based process, selecting a solution that will reduce travel time and improve document validation quality upon rollout
- Earned Quarterly Teamwork Award for cross-department contributions and initiative on process improvement projects

Business Administrator — Ardmore Toyota

October 2024 - March 2025

- Processed ~80 deals/month (50+ pages each), managing sensitive customer data including SSNs, credit history, and financial records - catching missing documents and signature errors before funding to prevent customer return trips
- Resolved ~10 funding issues per month as primary point of contact between the dealership and financial institutions, clearing documentation gaps to keep deals moving through the pipeline
- Implemented rigorous validation procedures to audit deal compliance, catching documentation errors and signatures before submission

Product Specialist — Ardmore Toyota

July 2023 - September 2024

- Consulted 20+ customers weekly on vehicle selection, tailoring explanations of hybrid technology, safety features, and financing to each customer's priorities and technical comfort level
- Generated 70% of sales through proactive VinSolutions follow-up, converting leads who needed additional time or information to make a confident decision
- Achieved 50% product attachment rate by clearly explaining value rather than pressuring - including one instance where showing a skeptical customer the actual invoice overcame distrust and closed the sale
- Consistently explained Toyota's hybrid system and standard safety technology in accessible terms, turning a technical differentiator into a key factor in customer decisions

Sales Trainer — Cellular Sales

July 2021 - June 2023

- Onboarded new Wireless Consultants using a hands-on methodology: trainees began as 'hands' while shadowing, then practiced as 'mouth' under supervision - building confidence through structured role reversal before independent work
- Simplified complex technical concepts by anchoring them to familiar experiences, reducing the learning curve for consultants unfamiliar with wireless technology and cross-platform data migration
- Collaborated with Team Lead to refine training practices, ensuring new hires internalized the consultative, integrity-first sales approach that defined the team's culture

Wireless Consultant — Cellular Sales

November 2020 - June 2021

- Analyzed and optimized 40+ Verizon accounts per week, identifying opportunities to upgrade devices, adjust plans, and reduce costs simultaneously
- Developed workarounds for common data transfer failures - including transferring photos from devices with no storage or unusable screens - reducing customer frustration and keeping transactions going
- Earned promotion to Sales Trainer after ~6 months based on consistent performance, strong customer interaction scores, and demonstrated integrity - recognized by the GM as a standard worth duplicating
- Earned Rookie of the Year (2021) in first full year, recognized for rapid performance ramp and consistent customer interaction scores

EDUCATION

LaunchCode, Software Development, 2026

University of Pittsburgh, Bachelor of Science in Business Administration, Marketing
